#### 1. Application

This specification applies to color TFT-LCD module, LQ104S1DG0A

These specification sheets are the proprietary product of SHARP CORPORATION("SHARP) and include materials protected under copyright of SHARP. Do not reproduce or cause any third party to reproduce them in any form or by any means, electronic or mechanical, for any purpose, in whole or in part, without the express written permission of SHARP.

The device listed in these specification sheets was designed and manufactured for use in general electronic equipment.

In case of using the device for applications such as control and safety equipment for transportation (conrrols of aircraft, trains, automobiles, etc.), rescue and security equipment and various safety related equipment which require higher reliability and safety, take into consideration that appropriate measures such as fail-safe functions and redundant system design should be taken.

Do not use the device for equipment that requires an extreme level of reliability, such as aerospace applications, telecommunication equipment (trunk lines), nuclear power control equipment and medical or other equipment for life support.

SHARP assumes no responsibility for any damage resulting from the use of the device which does not comply with the instructions and the precautions specified in these these specification sheets.

Confirm "12. Handling Precautions" item when you use the device.

Contact and consult with a SHARP sales representative for any questions about this device.

#### 2. Overview

This module is a color active matrix LCD module incorporating amorphous silicon TFT (Thin Film Transistor). It is composed of a color TFT-LCD panel, driver ICs, control circuit and power supply circuit and a White-LED backlight unit. Graphics and texts can be displayed on a 800 X 3 X 600 dots panel with 262,144 colors by supplying 18 bit data signal (6bit/color), two timing signals and supplying +3.3V DC supply voltage for TFT-LCD panel driving and supply voltage for backlight.

The optimum viewing angle is 6 o'clock direction.

The viewing angle where gray scale doesn't reverse easily is 12 o'clock direction.

LED Backlight-driving DC/DC converter is not built in this module.

# 3. Outline specification.

Parameter	Specifications	Unit
Display size	26 (10.4") Diagonal	cm
Active area	211.2(H)×158.4(V)	mm
Pixel format	800(H)×600(V)	pixel
	(1 pixel=R+G+B dots)	-
Pixel pitch	0.264(H)×0.264(V)	mm
Pixel configuration	R,G,B vertical stripe	-
Display mode	Normally white	-
Unit outline dimensions *1	243.0(W)×183.8(H)×Max.(9.5) (D)	mm
Mass	500(MAX)	g
Surface treatment	Anti-glare and hard-coating 3H	-

<sup>\*1:</sup> excluding backlight cables.

Outline dimensions is shown in Fig.1

#### 4. Input Terminals

#### 4-1. TFT-LCD panel driving

CN1 Employed connector: 9686S-40B-GF (IRISO) Terminal: Au plating [Note 1]

Pin No.	Symbol	Function	Remark

		(High voltage side)
6	-ch3	Power supply for LED3
		(Low voltage side)

#### 5. Absolute Maximum Ratings

Parameter	Symbol	Condition	Ratings	Unit	Remark
Input voltage	$V_{I}$	Ta=25°C	$-0.3 \sim \text{Vcc+0.3}$	V	[Note1]
+5V supply voltage	Vcc	Ta=25°C	$0 \sim + 4.0$	V	
Storage temperature	Tstg	_	-30~80	$^{\circ}$ C	
Operating temperature (PanelSurface)	Tops	_	-30~80	$^{\circ}$ C	[Note2], [Note3]

[Note1] CK,R0~R5,G0~G5,B0~B5,ENAB

[Note2] Humidity: 95%RH Max. at Ta $\leq 40$ °C.

Maximum wet-bulb temperature at 39°C or less at Ta>40°C. ( No condensation.)

[Note3] There is a possibility of causing deterioration in the irregularity and others of the screen and the display fineness when preserving or using it from 65 to  $80^{\circ}$ C.

## 6. TFT-LCDpaneldriving

 $Ta=25^{\circ}C$ 

Parameter	Symbol	Min.	Тур.	Max.	Unit	Remark
Supply voltage	Vcc	+3.0	+3.3	+3.6	V	[Note1]
Current dissipation	Icc	I	300	450	mA	Vcc=3.3V [Note2]
Current dissipation (Black pattern)	Ів	I	300	400	mA	Vcc=3.3V
Permissive input ripple voltage	$V_{RF}$	I		100	mVp-p	
Input voltage (Low)	$V_{ m IL}$	I		0.9	V	[Note3]
Input voltage (High)	$V_{\mathrm{IH}}$	2.1		_	V	
Input current (low)	$I_{OL1}$	-		1.0	μΑ	V <sub>I</sub> =0V [Note4]
	I <sub>OL2</sub>	_	_	10	μΑ	V <sub>I</sub> =0V [Note5]
Input current (High)	I <sub>OH1</sub>	_	_	1.0	μΑ	V <sub>I</sub> =Vcc [Note4]
	I <sub>OH2</sub>	_	_	300	μΑ	V <sub>I</sub> =Vcc [Note5]

# [Note1]On-off conditions for supply voltage

0<T1≦15ms

0<T2≦10ms

 $0 < T3 \le 100 \text{ms}$ 

0<T4≦1s

200ms<T5

# Vcc-dip conditions

1) 2.5V≦Vcc Td≦10ms

Vcc-dip conditions should also follow the On-off conditions for supply voltage

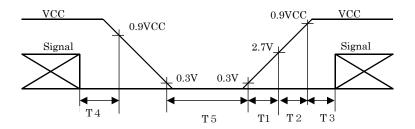

[Note2] Typical current situation: 16-gray-bar pattern.

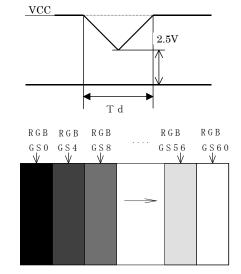

Vcc=+3.3V

[Note3] CK,R0~R5,G0~G5,B0~B5,ENAB

[Note4] CK,R0~R5,G0~G5,B0~B5

[Note5] ENAB

#### 7. Backlight driving

The backlight system is an edge-lighting type with white-LED.

The characteristics of LED are shown in the following table..

(It is usually required to measure under the following condition. Ta= $25^{\circ}$ C  $\pm 2^{\circ}$ C)

Parameter	Symbol	Min.	Тур.	Max.	Unit	Remark
LED voltage	$V_{\rm F}$	_	31	36	V	Value for one channel
LED current range	$I_{\mathrm{F}}$	_	18	20	mA	Value for one channel
Number of circuit channel		_	3	_		[Note 1]
Lamp power consumption	$W_{\rm L}$	_	1.7	_	W	[Note 2]
LED Life time	$L_{L}$	_	25,000.	_	Hour	[Note 3]

[Note 1] The LED backlight is composed of 3 channels which (10)LED is connected in series.

[Note 2] Calculated value for reference (  $I_F \times V_F \ \times 3$  channel)

[Note 3] ① Lighting condition:

- The state of the LCD module installation: Landscape position and standing position
- Atmosphere temperature: 25°C
- •Lighting current: 18mA (Constant current drive/Continuous turning on)
- 2 Definition of Life time:

Brightness becomes 50% of the original value .(under condition ①)

#### 8. Timing Characteristics of input signals

Timing diagrams of input signal are shown in Fig.2.

#### 8-1. Timing characteristics

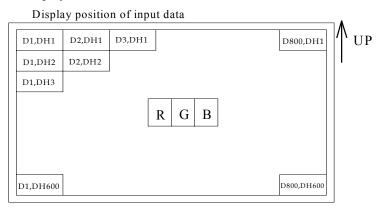

Pa	Parameter		Min.	Тур.	Max.	Unit	Remark
Clock	Frequency	1/Tc	_	40.0	42.0	MHz	-
	High time	Tch	6	-	-	ns	-
	Low time	Tcl	6	-	-	ns	-
	Duty ratio	Th/T	40	50	60	%	-
Data	Setup time	Tds	1	-	-	ns	-
	Hold time	Tdh	7	1	-	ns	-
Horizontal d	lisplay period	THd	800	800	800	clock	-
Enable	Setup time	Tes	5	1	Tc-10	ns	-
signal Pulse width		Тер	2	800	TH-10	clock	-
Vertical displ	ay period	TVd	600	600	600	clock	-

[Note] In case of lower frequency, the deterioration of display quality, flicker etc.,may be occurred.

## 8-2. Horizontal /Vertical display position

Display start timing is settled in accordance with a rising timing of ENAB signal as shown in Fig.2.

#### 8-3. Input Data Signals and Display Position on the screen

#### Data signal (R0~R5, G0~G5, B0~B5) Vertical invalid data period DH1 DH2 DH3 DH599 DH600 Vertical invalid data period Number of V-data line Data Enable signal (ENAB) Horizontal display position Clock signal (CK) Number of H-data line Data signal (R0~R5, G0~G5, B0~B5) Horizontal invalid period D1 D2 D3 D799 D800 Horizontal invalid data period THd 2. 1V Data Enable signal (ENAB) ₩ Tes Tep

White Uni	formity	δW		-	-	1.45		[Note5]

[Note] The measurement shall be executed 30 minutes after lighting at rating.

The optical characteristics shall be measured in a dark room or equivalent state with the method shown in Fig.3 below.  $(I_F=18\text{mA})$ 

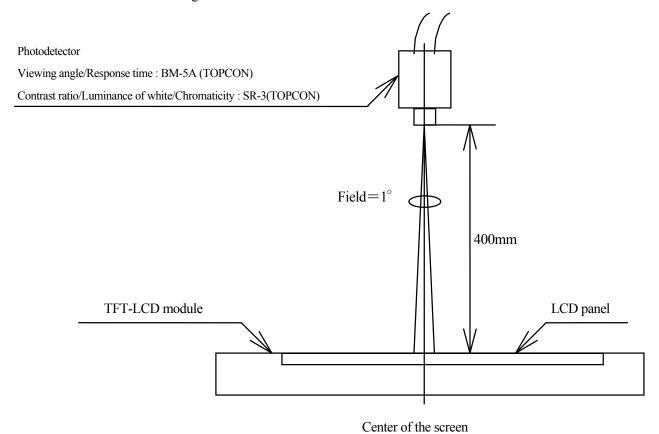

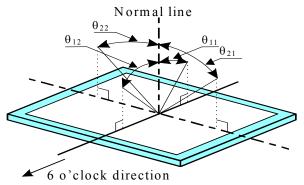

Fig.3 Optical characteristics measurement method

#### [Note1] Definitions of viewing angle range:

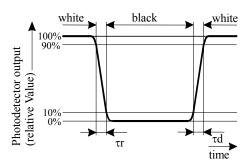

[Note2] Definition of contrast ratio:

The contrast ratio is defined as the following.

#### [Note3] Definition of response time:

The response time is defined as the following figure and shall be measured by switching the input signal for "black" and "white".

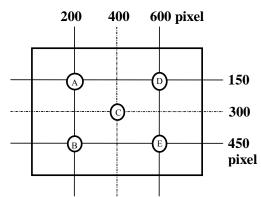

[Note5] Definition of white uniformity:

White uniformity is defined as the following with five measurements  $(A \sim E)$ .

#### 11. Display Quality

The display quality of the color TFT-LCD module shall be in compliance with the Incoming Inspection Standard.

#### 12. Handling Precautions

- a) Be sure to turn off the power supply when inserting or disconnecting the cable.
- b) Be sure to design the cabinet so that the module can be installed without any extra stress such as warp or twist.
- c) Since the front polarizer is easily damaged, pay attention not to scratch it.
  - Blow away dust on the polarizer with antistatic  $N_2$  blow. It is undesirable to wipe off because a polarizer is sensitive. It is recommended to peel off softly using the adhesive tape when soil or finger oil is stuck to the polarizer.
  - When unavoidable, wipe off carefully with a cloth for wiping lenses.
- d) Wipe off water drop immediately. Long contact with water may cause discoloration or spots.
- e) When the panel surface is soiled, wipe it with absorbent cotton or other soft cloth.
- f) Since the panel is made of glass, it may break or crack if dropped or bumped on hard surface. Handle with care.
- g) Since CMOS LSI is used in this module, take care of static electricity and injure the human earth when handling. Observe all other precautionary requirements in handling components.
- h) Since there is a circuit board in the module back, stress is not added at the time of a design assembly. Please make it like. If stress is added, there is a possibility that circuit parts may be damaged.
- i) Protection film is attached to the module surface to prevent it from being scratched . Peel the film off slowly , just before the use, with strict attention to electrostatic charges. Blow off 'dust' on the polarizer by using an ionized nitrogen.
- j) The polarizer surface on the panel is treated with Anti-Glare for low reflection. In case of attaching protective board over the LCD, be careful about the optical interface fringe etc. which degrades display quality.
- k) Do not expose the LCD panel to direct sunlight. Lightproof shade etc. should be attached when LCD panel is used under such environment.
- l) Connect GND to 4 place of mounting holes to stabilize against EMI and external noise.
- m) When handling LCD modules and assembling them into cabinets, please avoid that long-terms storage in the environment of oxidization or deoxidization gas and the use of such materials as reagent, solvent, adhesive, resin, etc. which generate these gasses, may cause corrosion and discoloration of the modules. Do not use the LCD module under such environment.
- n) Be careful of a back light lead not to pull by force at the time of the wiring to a LED driver, or line processing.
- o) When install LCD modules in the cabinet, please tighten with "torque =  $0.294 \pm 0.02 \text{N} \cdot \text{m} (3.0 \pm 0.2 \text{kgf} \cdot \text{c m})$ ". Be sure to confirm it in the same condition as it is installed in your instrument.
- p) Liquid crystal contained in the panel may leak if the LCD is broken. Rinse it as soon as possible if it gets inside your eye or mouth by mistake.
- q) Notice: Never dismantle the module, because it will cause failure.
  - Please do not peel off the Black tape pasted to the product. However, the panel protection film is excluded.
- r)Be careful when using it for long time with fixed pattern display as it may cause accidential image.
- s) Adjusting volume have been set optimally before shipment, so do not change any adjusted value. If adjusted value is changed, the specification may not be satisfied.
- t) If a minute particle enters in the module and adheres to an optical material, it may cause display non-uniformity issue, etc. Therefore, fine-pitch filters have to be installed to cooling and inhalation hole if you intend to install a fan.
- u) The LED used for this product is very sensitive to the temperature. Luminance decreases rapidly when it is used for a long time under the environment of the high temperature. Please consult our company when it is used under the environment like the above mentioned.

#### 13. Packing form

Product countries	JAPAN	CHINA
Piling number of cartons	6	
Package quantity in one carton	20	
Carton size	$486(W) \times 403(D) \times 322(H)$	
Total mass of one carton filled with full modules	12K g	
Packing form is shown Fig.4		g.4

#### 14.Reliability test items

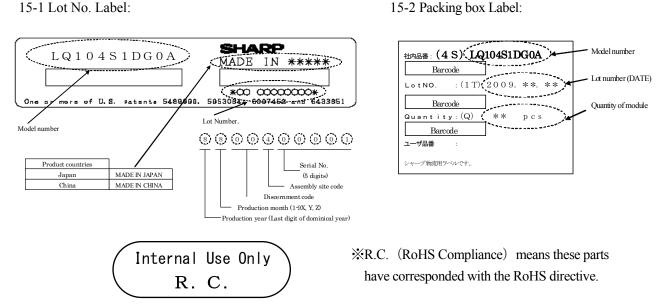

No.	Test item	Conditions	Remark
1	High temperature storage test	Ta=80 240h(Panel Surace)	
2	Low temperature storage test	Ta= - 30°C 240h	
3	High temperature	Ta=40°C;95%RH 240h	
	& high humidity operation test	(No condensation)	
4	High temperature operation test	Tp=80°C 240h	Panel surface
5	Low temperature operation test	Ta=-30°C 240h	
6	Vibration test	Frequency: 10~57Hz/Vibration width (one side): 0.153mm	
	(non- operating)	: $57\sim500$ Hz/Gravity: $19.6$ m/s <sup>2</sup>	
		Sweep time: 11 minutes	
		Test period: 3 hours	
		(1 hour for each direction of $X,Y,Z$ )	
7	Shock test	Max. gravity: 490m/s <sup>2</sup>	
	(non- operating)	Pulse width: 11ms, half sine wave	
		Direction: $\pm X, \pm Y, \pm Z$ once for each direction.	
8	ESD test	Human model	
9	EMI	VCCI (Class B)	

#### [Result Evaluation Criteria]

Under the display quality test conditions with normal operation state, these shall be no change which may affect practical display function. (normal operation state: Temperature: 15~35°C, Humidity:45~75%, Atmospheric pressure:86~106kpa)

#### 15.Others

#### 15-1 Lot No. Label:

If any problem occurs in relation to the description of this specification sheet, it shall be resolved 15-3 through discussion with spirit of cooperation.

#### 16. Storage conditions

<Environmental condition range of storage temperature and humidity>

Temperature 0 to 40 degrees Celsius

Relative humidity 95% and below

[Note] Please refer below as a mean value of the environmental conditions.

Summer time temperature 20 to 35 degrees Celsius

humidity 85% and below

Winter time temperature 5 to 15 degrees Celsius

humidity 85% and below

Please maintain within 240 hours of accumulated length of storage time, with conditions of 40 degrees Celsius and room humidity of 95%.

Direct sun light

Please keep the product in a dark room or cover the product to protect from direct sun light. Atmospheric condition

Please refrain from keeping the product with possible corrosive gas or volatile flux.

#### Prevention of dew

- \* Please store the product carton either on a wooden pallet or a stand / rack to prevent dew.

  Do not place directly on the floor. In addition, to obtain moderate ventilation in between the pallet's Top and bottom surfaces, pile the cartons up in a single direction and in order.
- \* Please place the product cartons away from the storage wall.
- \* Please maintain the storage area with an appropriate ventilation. It is recommendable to furnish the storage area with equipments such as ventilation systems.
- \* Please maintain the ambient temperature within the range of natural environmental fluctuation.

#### Storage period

Within above mentioned conditions, maximum storage period should be one year.
