

## Introduction

Turnkey LCD solutions involve organizing a customer's overall project and selling a complete solution. A design on the customer's end can simply be providing us with LCD requirements while AGDisplays provides a suitable solution.

Development team works closely with each client, from simple designs to complex projects. This service includes any of AGDisplays' solutions in accordance with customer specifications.

Services may include design/engineering support, subcontracting, first article approval, procurement & expediting of materials, performance guarantee testing, quality functionality testing and more.

## About Turnkey & Design

### Why Turnkey & Design?
