FAA § 145 REPAIR STATION

**PART 145
LIMITED ACCESSORY RATING**

About Us

For over a decade AGDisplays has been a leading provider of high quality LCD enhancement products and services for the industrial markets. We lead the way in offering an extensive range of custom panel solutions that improve standard display attributes while maximizing performance in any environment. The AGDisplays teams are experts in LCDs, from building simple or complex designs to integration work.

In our 124,000 sq. foot facility, we offer over 800 off the shelf products that include tablets, open and closed frame LCDs and much more. Our knowledge in innovative LCD technology and our high-quality control standards separate us from the rest. At AGDisplays, our teams have a true commitment to being your trusted partner.

§ 145 Repair Station

AGDisplays, in compliance with the requirements of the Code of Federal Regulations Title 14 Part 145 Repair Station, holds a Part 145 Limited Airframe, Limited Accessories rating.

Replacing in-flight entertainment TFT-LCDs costs companies thousands of dollars. Even the smallest blemish or scratch can prompt an LCD replacement. With AGDisplays' services, you can bypass the expensive LCD unit replacement and take advantage of our TFT-LCD repairs. Repairing, instead of replacing, decreases extra expenses and increases panel longevity.

AGDisplays corrects scratches by providing top and bottom glass polarizer repair for in-flight entertainment LCDs. A polarizer is a thin film on the top or bottom surface of the TFT-LCD that can be replaced using AGDisplays' approved process specifications. Our experts perform LCD repolarization in one of the multiple Class 1000 clean rooms that are located in our facility.

We achieve low fallout percentages by training technicians to exceptional standard.

AGDisplays maintains a technical library with OEM specifications, traceability documents and other technical information. The repair station properly documents, controls, and stores all applicable paperwork that accompanies services performed on articles for return to service. All repair station personnel are required to be familiar with the requirements of the repair station manual and all applicable FAA regulations. Our repair station personnel must follow the repair station quality control system when performing maintenance on articles being returned to service. Our FAA Part 145 Repair Station performs multiple inspections throughout the various stages of the maintenance process.

The AGDisplays facility performs maintenance and repairs to in-flight LCD panels in our facility in accordance with contract requirements. We employ Part 65 certified repairmen trained to inspect, repair, and approve airworthy LCD panels within the Repair Station's rating. Each Repair Station position in the repair station is evaluated on a regular basis to determine that the position is in compliance with CFR parts 43, 65, 91, and 145. Employees are subject to initial, recurrent and specialized training for the benefit of quality, safety and standards.

COMMUNITY OF EXPERTS

Whether we are met with a new design or challenged with improving an existing design, AGDisplays supports your team by delivering unparalleled LCD expertise and technology. AGDisplays' partners benefit from our efficient design process and our dedication to creating quality design solutions.

We saw the need for off the shelf products, so we've added an expansive line of open/closed frame LCDs, digital signage, and all-in-one products. We offer unique LCD products like advanced touchscreen tabletops, high quality medical displays and rugged mobile devices. All of which can benefit from our value add integration services. Our products are used across many industries including Military, Avionics, Marine, Industrial, Medical, Transportation and many more.

CERTIFICATIONS

AGDisplays values high-quality working and design standards. We support your teams with the knowledge & expertise needed to make strategic design and manufacturing decisions.
