

Introduction

Industrial repair utilizes all facets of AGDisplays' capabilities. We repair most aspects of LCD technologies so that our customers do not have to replace whole units for minor repairs.

We also provide repair warranty services for panels that are no longer under OEM warranty.

Our experts possess core competencies in LCD redesign, rebuilds, diagnosis, enhancements, and field application. AGDisplays is focused on refurbishing and repairing your LCDs; we specialize in providing cost-effective alternatives to LCD replacements.

About Industrial Repair

Why Industrial Repair?

- AGDisplays refurbishes your LCD with recycled LCD parts that are 100% tested
- Our LCD experts prepare custom display layouts including unit dimensions and segment content to redesign your panel for optimal functionality
- Our team has 40+ years of collaborative LCD repair experience to ensure your designs are handled properly
- We perform a full diagnostic analysis for each repaired unit that can include the following:
 - chromaticity analysis (color temperature)
 - luminance analysis
 - polarizer absorption axis analysis
 - optical film stack analysis
 - pixel defect inspection
 - uniformity analysis

When To Use This Service

- Need to extend the lifespan of your unit
- Your unit performs subpar but you do not want to replace the whole unit
- If you need additional LCD functions
- You need quality work you can trust

Prepare Details

- Overview of repair, if known
- Are there any LCD peripherals?
- Can sample be sent in for evaluation?
- Do you have additional parts?
- Bill of materials for unit being repaired i.e. part numbers.
